

HOSPITAL BOOKING APP FRONTEND TODO

1. PROJECT SETUP

- Create Vite React app
- Install dependencies
- Setup Tailwind CSS
- Setup folder structure
- Setup aliases (optional)
- Setup environment variables
- Setup Axios base config
- Setup React Query
- Setup Zustand store
- Setup React Router
- Setup toast system
- Setup reusable constants

2. DESIGN SYSTEM / THEME

- Extract theme from reference images
- Setup color tokens
- Typography system
- Spacing system
- Border radius system
- Shadow system
- Reusable button variants
- Input styles
- Card styles
- Badge styles
- Modal styles
- Loading skeleton design

- Empty states design
- Mobile responsiveness base

Theme Direction:

- Practo inspired
- Clean medical UI
- White + soft blue + teal
- Minimal gradients
- Premium but simple feel
- Dark mode later (prepare structure only)

3. FOLDER STRUCTURE

Setup folders:

src/

```
|
|  └─ api/
|  └─ assets/
|  └─ components/
|    └─ common/
|    └─ ui/
|    └─ layout/
|
|  └─ features/
|    └─ auth/
|    └─ doctors/
|    └─ appointments/
|    └─ notifications/
|    └─ prescriptions/
|    └─ dashboard/
|
|  └─ hooks/
```

└─ layouts/
└─ pages/
└─ routes/
└─ store/
└─ utils/
└─ constants/

=====

4. ROUTING SYSTEM

=====

Public Routes:

- Home
- Doctors listing
- Doctor details
- Login
- Signup
- Verify OTP
- Forgot password

Protected Patient:

- Dashboard
- My appointments
